**Suspected Upper GI Cancer 2ww fast track**

*It is expected that the following would be included on a 2WW referral form as standard*

- Has it been explained to the patient that this referral is for investigations that could lead to a cancer diagnosis?
- Have you checked that the patient will be available in the next 14 days to attend an appointment?
- Have you provided the patient with further information about the appointment (a leaflet is recommended).

*If direct access to endoscopy is available locally, the same information should be provided to patients about reason for referral*

**Referral Criteria**

**URGENT UPPER GI ENDOSCOPY**

- For people with an upper abdominal mass consistent with stomach cancer
- Dysphagia of any age
- aged ≥ 55yr with weight loss with any of the following:
  - Upper abdominal pain/(or)
  - reflux/ (or)
  - dyspepsia

**Suspected Pancreatic Cancer**

Refer using the cancer pathway for patients age ≥ 40 with jaundice

To assess for pancreatic cancer in patients FOR CT SCAN DIRECT aged ≥ 60 with weight loss and any of the following:

- Diarrhoea
- Back pain
- Abdominal pain
- Nausea/vomiting
- Constipation
- New onset diabetes
